Activity Report On Research Opportunities in Chemistry.

The Department of Chemistry, Sanjivani Arts, Commerce & Science college, Kopargaon organized an International Seminar On Research Opportunities in Chemistry. On 16th Nov.2022.

About the Event:

International Seminar On Research Opportunities in Chemistry, On 16th November,2022 was organized by Sanjivani Arts, Commerce & Science college, Kopargaon. The speakers from foreign research background had been invited, where the chief speaker **Dr Ramesh Dateer** who is assistant professor at catalysis and organic synthesis group centre for Nano and material science Jain University Bangalore was physically present to seminar while **Dr Yashwant Pandit** who is postdoctoral researcher at Ben-Gurian University Israel and **Dr.Sachin Wagh** synthetic and medicinal chemist dialogues exhaust United state was on online conference. The inauguration ceremony honorable **Sri Sumit Dada kolhe** (Trustee of Sanjivani rural education institute) ,**Hon. D.N Sangle** (Director Non Academics), **Dr S.B Dahikar**(Principal of Sanjivani Art's Commerce and Science College) was present . . The program was inaugurated by lighting the lamp and Saraswati Vandana by the dignitaries. Dr. S. B. Dahikar, Convener of the seminar in his welcome address introduced the rationale and objective of the International Seminar to the audience.**Dr.Ramesh Dateer** Who is Assistant Professor at Catalysis and Organic Synthesis Group Centre for Nano and Material Sciences Jain University, Bangalore told participants about his research work in chemistry on Gold-catalyzed new organic transformations involving activation of C-C triple bond for the synthesis of N and O containing molecules and he also aware the participants about career opportunities in organic chemistry. In second session Dr

Sachin Wagh who is Research Instructor at UT Southwestern Medical Center, United States of America explain his research work in the field Organic chemistry and explained the recent research trends in Organic Chemistry . A short lunch break for refreshments had been taken .In the third session Dr.Yashwant Pandit who is Postdoctoral Researcher at Ben-Gurion University, Israel explains the different research opportunities in organic chemistry in foreign countries. More than 150 students were present for this seminar and all faculties were also present for this session. This session is regarding with the Recent Research trend In Organic chemistry, Career Opportunity and Future Perspectives. Mr. Gadhave sir gave vote of thanks.

The main objective of the seminar

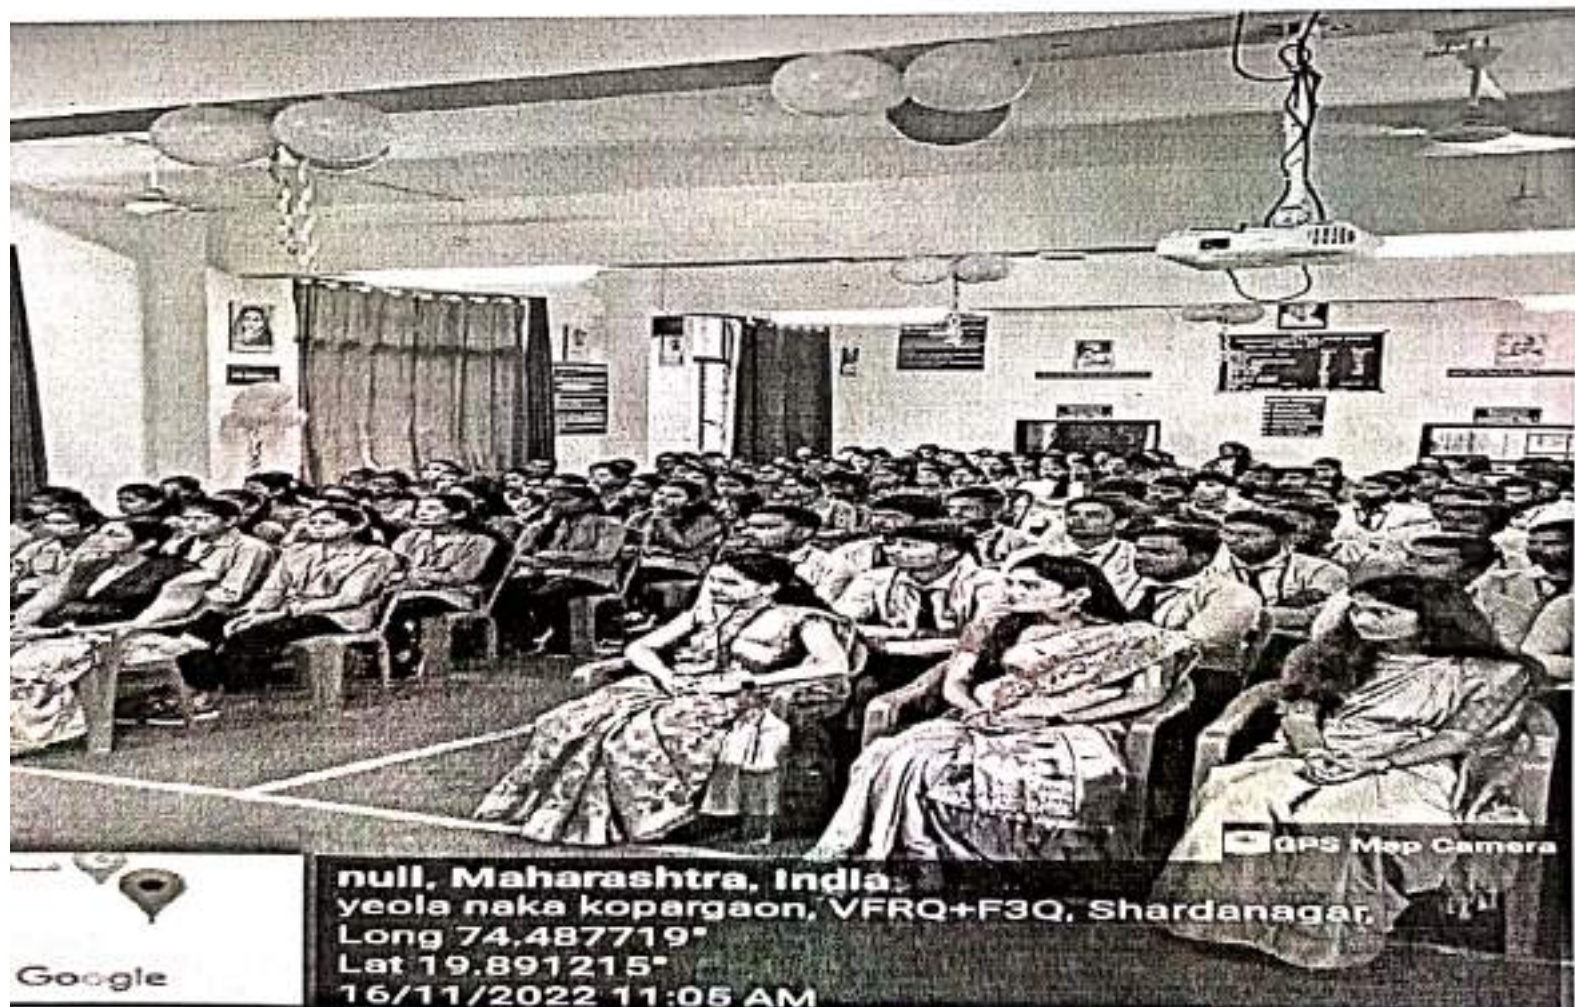

- 1) Enhance the knowledge.
- 2) Encourage the students for Ph.D after higher education.
- 3) To develop the interests of students in field of research.
- 4) To give the opportunity to students to interact with international researcher.
- 5) Enhance knowledge of students about Research in foreign countries.

Outcomes of session:

Students gain the knowledge about Research and developments. They understood the process of Research and necessity of Research and development. Maximum students gives the positive feedback regarding with these activity. India is a rapidly developing country, and one of the main reason behind this rapid development is the Research on different topics and because of this multiple jobs created across the country.
